

Download Acidity Theory Of Atherosclerosis New Evidences

I'm delighted to inform you about our new hypothesis for the cause and therapeutic of stroke. It is backed by a large and strong number of scientific evidences.

New Evidences: Acidity Theory of Atherosclerosis "Carlos, your thesis on stress, acidic environment and CHD is brilliant. Particularly impressive is how you relate reduced pH to increased oxidation of LDL, which increases its atherogenicity" by David M Diamond, PhD*, THINCS forum on June 22, 2011.

Carlos Monteiro developed in 2006 the acidity theory of atherosclerosis, which gives a new explanation for the pathophysiological process of coronary artery disease, complementing the myogenic theory of myocardial infarction. In 2011 he launched the book in Portuguese "Following the steps of a genius – A saga in medicine" dedicated in great part to the scientific memoir of Dr. Mesquita and his researches about the cause and treatment of myocardial infarction.
