He offers a case study of British engineers and their connections with and involvement on the African continent between 1875 and 1914. During this period, the African crown colonies and territories were heavily reliant on British-based engineers and contractors who, through the crown agents or the Foreign Office, were responsible for designing, and often constructing, infrastructural projects.

British Engineers and Africa, 1875-1914 and over one million other books are available for Amazon Kindle. Learn more

Empires in Perspective This important series examines a diverse range of imperial histories from the early modern period to the twentieth century. Drawing on works of political, social, economic and cultural history, the history of science and political theory, the series encourages methodological pluralism and does not impose any particular conception of historical scholarship.
