

Download Epileptic Syndromes In Infancy Childhood And Adolescence

In this paper the following are reviewed: the idiopathic epilepsy syndromes in infancy; the idiopathic focal epilepsies of childhood and the familial (autosomal dominant) focal epilepsies; the idiopathic generalised epilepsies; the symptomatic and probably symptomatic focal epilepsies; and the epileptic encephalopathies. Although a syndrome diagnosis is not possible in all children with epilepsy, where it is, it is likely to offer the best guide to management and prognosis.

Since 1984, the year of the publication of its first edition, the famous “Blue Guide” has been the international reference for paediatricians and neuropaediatricians with regard to epileptic syndromes in infants, children and adolescents.

Lennox–Gastaut syndrome (LGS) is childhood-onset epileptic encephalopathy manifested by frequent polymorphic seizures, including tonic axial, obvious cognitive impairments, characteristic ECG ...
