In this chapter you learn that MATLAB is a matrix-based computer system designed to assist in scientific and engineering problem solving. You also learn that one way to use MATLAB is to enter commands and statements on the command line in the Command Window. In this case the commands you enter are carried out immediately. You are also introduced to a number of useful built-in commands and functions.

This updated edition includes the latest MATLAB versions through 2016a, and is an ideal book for a first course on MATLAB, or for an engineering problem-solving course using MATLAB, as well as a self-learning tutorial for professionals and students expected to learn and apply MATLAB.

The essentials of MATLAB are illustrated throughout, featuring complete coverage of the software's windows and menus. Program design and algorithm development are presented clearly and intuitively, along with many examples from a wide range of familiar scientific and engineering areas.
