Check out the strangest things found in the philippines! This top 10 list of crazy and bizarre filipino discoveries has some of the weirdest findings ever!

Via Wikimedia Commons. One of the world's smallest primates, the Philippine tarsier (*Tarsius syrichta*) is a nocturnal animal commonly found in the islands of Samar, Leyte, Bohol, and Mindanao.

Balut is popular street food, which originated in the Philippines and is also frequently found in Vietnam, Laos and Cambodia. The ideal age of the duck embryo is 17 days, when the chick is not old enough to fully show its beak, feathers, claws and the bones are undeveloped.

The Philippines had a large and diverse group of mammalian species in the past. They are widely distributed across the archipelago. However, they became extinct due to several factors. There are at least eight mammalian species that have been extinct since the Pleistocene Epoch.

There are a variety of land resources found in the Philippines. These resources include the Ocean, minerals, major crops (such as rice, corn, and sugarcane), as well as flora.

Though some plants from the list of herbal plants found in the Philippines are not originated from the Philippines but they are the herbal plants commonly used as home remedy or traditional medication to treat some common diseases. However, there are also some plants that are used to treat even more serious diseases like dengue fever, diabetes and even cancer.

The Negros shrew can only be found on the island of Negros in the Philippines and is locally named as the Katsuri. Because of the limited region where the Katsuri resides, it has been included in the IUCN red list and classified as critically endangered. The occurrence of the shrew is less than every 5,000 square km. It can be spotted in only five locations on the island.

Mining gold in the Philippines can be difficult. The country's mining sector remains largely untapped, and much of that has to do with political turmoil and controversy.

The Philippines (/ ˈ f ɪ l ɪ p i n z / FIL-?-peenz; Filipino: Pilipinas [ˈpɪlɪˈpinas] or Filipinas [ˈfɪlɪˈpinas]), officially the Republic of the Philippines (Filipino: Republika ng Pilipinas), is an archipelagic country in Southeast Asia.
