Fruit-growing in arid regions : an account of approved fruit-growing practices in the inter-mountain country of the Western United States comprising the States of Colorado, Montana, Idaho, Utah, Nevada, and in northern Arizona and New Mexico, with applications to adjacent regions

8 Fruit-growing in Arid Regions saved from a fire set by a careless hand to destroy weeds. Only about 150 of the 6000 trees were rescued from the debris left from the flood, and in 1866 these were set out in an orchard on Mr. Lee's upland farm. Many of these trees are living yet, and yearly yield crops of golden fruit, and look as if they will continue to do so for many years to come.

Use the map provided below for a guide to Tasmania's main fruit-growing regions. Each of these regions are also perfect tourist destinations, with rich histories and unique landscapes that truly connect visitors both culturally and emotionally to the State.
