

# Download Ham Radio Beginner License Station

You need a license from the FCC to communicate via a Ham radio. But with recent changes (like dropping the Morse code requirement), you can easily prepare for the test in just a few days using free online resources. The test is usually only \$10-15. Combined with the advent of affordable and easy-ish to use Ham radios, it's become much more practical to incorporate amateur radio as part of your emergency preparedness.

To get started with your ham radio license process, you'll likely want to find a class or book to dig into and then take your test. HamRadio 360 has a great list of study materials for you to start with. Once you know your stuff, you'll want to look for a local club in your area for a testing session.

Don't listen to people who say you won't need a ham radio license during an emergency. The license is easy but learning how to actually communicate with someone is not. Get a license. Here's how I did it.

Get your FIRST (Technician) ham radio license! For exams beginning July 1, 2018. Item No. 0871 - \$29.95

Ham radio operators use a linear amplifier to increase the transmitter's signal strength. In the U.S., the FCC allows a maximum of 1,500 watts on amateur frequencies. The FCC requires that you use only the power necessary for a "QSO," which is the term for contact, or conversation between two radio operators. The benefit of using an amplifier is that a distant contact won't have to strain to hear you.

Lot's of you stand on the fringes, intimidated by HAM, or amateur, radio. While there IS much to learn, this video is the start of a series that will answer all of your questions and get YOU ...
