Buildings have often been studied whole in space, but never before have they been studied whole in time. How Buildings Learn is a masterful new synthesis that proposes that buildings adapt best when constantly refined and reshaped by their occupants, and that architects can mature from being artists of space to becoming artists of time.

The series was based on my 1994 book, HOW BUILDINGS LEARN: What Happens After They're Built. The book is still selling well and is used as a text in some college courses. Most of the 27 reviews ...

It is the people that use them, design them and build them that learn. Buildings change, sometimes for better; sometimes not so much. Also, the book, published in 1996 is quite dated. Much of it is not relevant to the building industry today. A moderately interesting read, but I wouldn't buy it again.
