The book *Invasive Species in a Globalized World: Ecological, Social, and Legal Perspectives on Policy*, Edited by Reuben P. Keller, Marc W. Cadotte, and Glenn Sandiford is published by University of Chicago Press.

Over the past several decades, the field of invasion biology has rapidly expanded as global trade and the spread of human populations have increasingly carried animal and plant species across natural barriers that have kept them ecologically separated for millions of years.

Many experts from these disciplines are working on invasive species, but this work has rarely crossed disciplinary boundaries. This book brings together experts from many disciplines to present multi-disciplinary perspectives on the impacts of invasive species, and how policy can be created and enacted to reduce those impacts.
