Organic food is often more expensive than conventionally-grown food. But if you set some priorities, it may be possible to purchase organic food and stay within your food budget. But if you set some priorities, it may be possible to purchase organic food and stay within your food budget.

Organic food is more dangerous than conventionally grown produce because organic farmers use animal manure as the major source of fertilizer for their food crops. Animal manure is the biggest reservoir of these nasty bacteria that are afflicting and killing so many people.

Yes, organic food can be expensive, but plenty of organic food is affordable. In many cases, organic food may cost less than conventional food. In addition, conventional food has some hidden costs, such as health costs related to issues caused by pesticides and the costs of cleaning up the environment once we unleash chemicals and pesticides.
