Note, that a performance test will have effect on the CPU time (usage of the web app). So when you're running a performance test multiple times and your web app uses the free pricing plan your web app may be stopped when reaching the usage limit. You'll notice the same problem with the pricing plan of Application Insights.

I think real Jon Skeet does not have time to post answers on SO. All you guys care all about reputation, not for the best answer. Some SO users may have 2 accounts and they vote for themselves but from another account.

Performance tests are best conducted in test environments that are as close to the production systems as possible. Isolate the performance test environment from the environment used for quality assurance testing.
